Re: 21 U.S.C. Section 343(r)(6), Notification of Statements on Dietary Supplements

Dear Sir/Madam:

I hereby notify the Food and Drug Administration ("FDA") of the use of statements of nutritional support in the labeling of GliSODin[®], 100 mg Caps, a dietary supplement.

Statements being made in the labeling of GliSODin[®], 100 mg Caps:

(1) GliSODin[®] is the first orally effective form of SOD. GliSODin[®]'s patented matrix of melon-derived SOD and gliadin, a wheat protein, protects it from degradation in the digestive tract, while promoting its uptake by the body. SOD is a key cellular antioxidant that is instrumental in neutralizing the potent superoxide radical, thereby constituting an important system for the protection of cells and tissues against degeneration by free radicals. GliSODin[®] has been shown in clinical and non-clinical studies to modulate the activity of SOD, as well as the two other essential cellular antioxidants, Glutathione and Catalase. A clinical study has further demonstrated GliSODin[®]'s ability to protect against oxidative stress and DNA damage. To the best of my knowledge, and based upon information and belief present at the time of the executing of this notice, I certify that the above information is accurate and complete. NOW Foods possesses substantiation that the statements are truthful and not misleading.
